## Work Experience

### Fiverr

Freelance

- Strengthened the security and optimized the response time of the **Enlightenment.AI** system by implementing **JWT-token** authorization and enhancing data filtering in the **GraphQL API**.
- Streamlined the hiring web application at **UXLIVINGLAB** by integrating the **Ant design UI** in **ReactJS**, constructing **RESTful APIs**, and seamlessly integrating them with the frontend.
- Expanded the global reach of the **NextJS** application by integrating **i18next** and enabling translation capabilities for five languages, enhancing its accessibility and user experience

### whatsonscreen

Freelance

- Successfully integrated **Razorpay** and **Stripe** payment gateways into web applications, enabling secure and seamless transactions for users.
- I architected and implemented a powerful warning system, effectively protecting users from adult-site visits and fostering a responsible online atmosphere.
- Developed a comprehensive internet activity tracking solution that enables parents to proactively monitor and safeguard their children's digital experiences

## Education

### Aligarh Muslim University

Bachelor Of Technology, Mechanical Engineering

ZHCET, India

Aligarh, India

2022 - 2026

## Projects

### JAHAN Webframework

- Developed a backend **Flask-inspired** web framework with integrated **WSGI server**, enabling seamless web app creation.
- Included **SQLite** integration for efficient data storage and retrieval in the backend.
- Equipped the framework with **ORM** functionality for smooth database interactions, enhancing development efficiency.

### Chat Server

- Created a simple chat server using **Python's** built-in **WebSocket** library for real-time communication, complemented by a **Flask GUI**.
- Enabled **terminal communication**, leveraging **WebSocket** and **Python**, making it versatile and user-friendly for messaging interactions

## Skills

**Languages** Python, JavaScript, C/C++, C#

**Databases** Firebase, MongoDB, PostgreSQL

**Frameworks** Django, Flask, ReactJS, NextJS and React-Native

**Deployment/Hosting** Heroku, AWS, Firebase, Digital Ocean

**DevOps** Git, Docker and Github Actions

With a strong background in contributing to various open-source organizations, I showcase exceptional communication and collaboration skills. Additionally, I possess experience in game development using Unity and C#.
